

## ***Allan Block Segmental Retaining Wall Inspector Program***

### ***Course Description***

The Allan Block Inspection presentation is an introductory course regarding the proper installation and construction inspection of segmental retaining walls (SRW). The intent is to develop a basic understanding of how SRW's are built and what to look for when inspecting SRW construction work. Attendees can expect to gain the following skills:

1. Describe the principles of wall design and how SRW products work
2. Recognize basic SRW construction practices
3. Identify reasons why retaining walls fail

### ***Ideal Attendee***

This course is best suited for building inspectors or engineers that will be monitoring the installation and construction of SRW's. Prior knowledge or experience is not required to attend.

### ***Requirements for Successful Completion***

1. Attendance for entire course
2. Completion of the End-of-Course Assessment

\*IACET CEU's awarded upon successful completion = 0.1
